PATIENT HISTORY PORTAL

Requested Enhancements

1. Patient Admission & Payment Details

- Capture the patient's name and date of joining/admission.
- Add an emergency contact number.
- Record consultation fee amount and consultation date.
- Add monthly fee/amount details.
- Payment details should be entered manually by the authorized staff: payment date, payment method and amount paid.

2. Chief Complaint – Audio & Transcript

- Provide an option to record the patient explaining their chief complaint.
- Generate a text transcript from the audio and allow the transcript to be reviewed/edited and saved in the patient record. cr
- Capture the episode type, including an "Other" option.
- Add a "Since when?" field to record how long the patient has been experiencing the pain/complaint.

3. Medical History

- Record Thyroid, Hypertension and Diabetes separately.
- All the deceases should be given in separately by including the past and present readings
- For each condition, capture since when the patient has had it.
- Provide separate fields to record the current parameters/readings for each condition.

4. Objective Details & Diagnostic Investigations

- Add Height to the objective assessment section.
- Provide an attachment/upload option for diagnostic investigations, including X-ray reports/images and other relevant investigation documents.

5. Therapy Notes & Follow-up

- Provide a three-month therapy/practice plan.
- Allow practices to be recorded week-wise (Week 1, Week 2, and subsequent weeks).
- Add a separate section to record precautions.
- Add follow-up and patient feedback sections.

6. Feedback and Follow-up

one more column

Expected Update

Please add the above fields and options to the existing patient portal while retaining the current patient-record structure. These are the specific updates requested from the review notes.
